## EXPERIENCE

### Personal Website

September 2022

This is a personal project I made to have my personal website and practice with Next.js and React.

**Stack:** Next.js, React, JavaScript, HTML, CSS

### Planet Wars

May 2022

The goal of this project is to create a ship game with Java and graphical interfaces for the GUI. The game is about surviving waves of enemies with the goal of destroying and looting your planet. Your objective will be to prepare your troops to face this threat.

**Stack:** Java, SQL Developer

### Choose Your Story

March 2022

Using Python and SQL hosted Azure, we've created the game 'Choose your Story', which is a game of choice where we can choose different stories where you will star as a character who must go choosing different options to continue their adventure, this is a linear story game, that when the adventure ends it can end in one way or another. We also made a website for the game.

**Stack:** Python, SQL, Azure VM, HTML, CSS

## ACADEMIC BACKGROUND
